## Projects

### **APCSE Website Redesign (WordPress)**

<https://apcse.com/>

WordPress site originally published in 2016 redone with the intent to fix typos, adjust post settings, keep it responsive, and overall simplify/modernize the look.

Stack: HTML, CSS, WordPress/PHP

### **Pi Estimator With Vue**

<https://jsharifz.github.io/Pi-Estimator-Vue/>

Using random numbers and basic geometry, the value of Pi is estimate with increasing iterations.

Stack: HTML, CSS, JavaScript, Vue.js

### **Gallery Custom Module**

<https://javad-node-assignment-3.herokuapp.com/>

Dynamically generated pages using express/EJS3 with data retrieved from MongoDB; image endpoints are the id of the image.

Stack: HTML, CSS, Node JS, Express, EJS, MongoDB

### **CSS Bulova Digital Watch**

<https://jsharifz.github.io/Buluva-Watch/>

The Bulova Archive Series Digital watch redone entirely with CSS. The watch face is updated with the moment.js module.

### **Sass News Site**

<https://jsharifz.github.io/projects/project%203/home.html>

Group Sass extension project to generate a framework mock site.

Stack: HTML, CSS, Sass, JavaScript
